Catatan Peer Reviewer :

1. Tentang Kelengkapan Unsur isi.
kelengkapan unsur artikel sudah baik, lengkap dan sesuai dengan kaidah penulisan artikel ilmiah. Komponen artikel meliputi abstrak, pendahuluan, metode, hasil, pembahasan, kesimpulan dan daftar referensi yang relevan dengan studi.
2. Ruang lingkup dan kedalaman pembahasan
Ruang lingkup penelitian ini membahas mengenai prevalensi dan determinan gejala depresi yang dialami oleh kelompok dewasa muda di Indonesia. Pembahasan cukup komprehensif dengan membahas kondisi kesehatan mental = individu meliputi pikiran dan terhadap kesehatan diri, fungsi fisik, dan adanya kondisi kronis yang dimiliki. Variabel independen yang diteliti sebanyak 9 dengan hasil 3 variabel yang akan memengaruhi gejala depresi pada sampel. Pembahasan disajikan dengan sangat jelas.
3. Kecukupan dan Kemutakhiran data / informasi dan metodologi
penelitian dilakukan dengan menggunakan dataset sekunder dari the Indonesian Family Life Survey (IFLS) ke-5 yang merupakan data hasil survey nasional representative dan berkelanjutan. Studi melibatkan 50.148 responden yang diwawancarai dengan besar sampel 15 demikian mampu membandingkan hasil penelitian yang representatif terhadap populasi nasional. Analisis data menggunakan analisis deskriptif, chi-square test dan uji multivariat regresi logistik dengan software STATA versi 14.
4. Kelengkapan unsur dan kualitas terbitan
Kualitas dan kelengkapan unsur penerbit/jurnal sudah baik dan telah terindex Database International Bibliography of Book to SCOPUS Q2 (SJR 2018 0.446; H-Index 34). DOI disertakan pada setiap artikel yg diterbitkan. Penerbitan oleh penerbit Wiley Online Science penerbit tersebut telah masuk dalam Beall's list. Index similarity artikel menggunakan Turnitin mendapatkan hasil pemiripan sebesar 17.9%.

Catatan Peer Reviewer :

1. Tentang Kelengkapan Unsur isi

Kelengkapan artikel ini sangat baik sesuai dengan kaidah Ilmiah. Artikel ini memiliki komponen yaitu abstrak, pendahuluan, hasil dan pembahasan, metode penelitian serta kesimpulan. Daftar referensi yang digunakan sudah memenuhi aspek-aspek relevansi, proporsionalitas dan kebaruan.

2. Ruang lingkup dan kedalaman pembahasan

Ruang lingkup penelitian ini membahas mengenai gambaran prevalensi depresi pada orang dewasa Indonesia dan faktor-faktor kondisi kesehatan apa saja yang berhubungan dengan gejala depresi tersebut. Kondisi kesehatan yang diteliti mencakup penilaian keadaan kesehatan secara mandiri (self-rated), fungsi jasmani dan kondisi penyakit kronis. Penelitian ini memanfaatkan data data sekunder yang diperoleh dari IFLS 5 (Indonesian Family Life Survey) atau survei aspek kehidupan rumah tangga Indonesia (SAICERTI-5). Metode penelitian menggunakan metode Cross Sectional. Tema penelitian dan tujuan yang ingin dicapai sesuai dengan bidang ilmu dan keahlian penulis dalam bidang keperawatan.

3. Kecukupan dan Kemutakhiran data / informasi dan metodologi

Analisis Statistik dalam penelitian ini dilakukan dengan menggunakan model statistik deskriptif dan regresi logistic berganda dengan metode backward. Penggunaan metode analisis sudah sesuai dengan tujuan penelitian yang ingin menguji hubungan antar variabel yang diteliti sehingga menghasilkan hasil analisis data yang dapat dipertanggung jawabkan.

4. Kelengkapan unsur dan kualitas terbitan

Kualitas dan kelengkapan unsur Penerbit baik serta terindex Database International bereputasi yaitu SCOPUS Q2 (SJR 2019 0.54) dengan disertai DOI pada setiap terbitan artikelnya. Diterbitkan oleh penerbit Wiley-Blackwell Publishing Ltd yang berkedudukan di United States dan merupakan penerbit bereputasi International serta sudah termasuk dalam Beall's List. Index similarity melalui TURNIT menunjukkan kemiripan sebesar 17%.

Subject: Nursing Forum - Decision on Manuscript ID NF-10-19-OA-1257
To: <erniastutik@fkm.unair.ac.id>

19-Nov-2019

Dear Ms Astutik:

Manuscript ID NF-10-19-OA-1257 entitled "The Prevalence and Determinants of Depressive Symptoms among Adults in Indonesia: A Cross-sectional Population-Based National Survey" which you submitted to Nursing Forum, has been reviewed. The comments of the reviewer(s) are included at the bottom of this letter.

The reviewer(s) have recommended minor revisions to your manuscript. Therefore, we invite you to respond to the reviewer(s)' comments and revise your manuscript.

To revise your manuscript, log into <https://mc.manuscriptcentral.com/nf> and enter your Author Center, where you will find your manuscript title listed under "Manuscripts with Decisions." Under "Actions," click on "Create a Revision." Your manuscript number has been appended to denote a revision.

You will be unable to make your revisions on the originally submitted version of the manuscript. Instead, revise your manuscript using a word processing program and save it on your computer. Please also highlight the changes to your manuscript within the document by using the track changes mode in MS Word or by using bold or colored text.

Once the revised manuscript is prepared, you can upload it and submit it through your Author Center.

When submitting your revised manuscript, you will be able to respond to the comments made by the reviewer(s) in the space provided. You can use this space to document any changes you make to the original manuscript. In order to expedite the processing of the revised manuscript, please be as specific as possible in your response to the reviewer(s).

IMPORTANT: Your original files are available to you when you upload your revised manuscript. Please delete any redundant files before completing the submission.

Because we are trying to facilitate timely publication of manuscripts submitted to Nursing Forum, your revised manuscript should be uploaded as soon as possible. If it

is not possible for you to submit your revision in two weeks, please let us know.

If you feel that your paper could benefit from English language polishing, you may wish to consider having your paper professionally edited for English language by a service such as Wiley's at <http://wileyeditingservices.com>. Please note that while this service will greatly improve the readability of your paper, it does not guarantee acceptance of your paper by the journal.

Once again, thank you for submitting your manuscript to Nursing Forum and we look forward to receiving your revision.

Sincerely,
Dr Patricia Yoder-Wise

Comments to the Author

There is one typo "halth" instead of "health." Excellent job! I actually spent much of my childhood in Indonesia so greatly enjoyed your research. You have laid the ground work for important community mental health reform and future research both in Indonesia as well in other areas around the world. Kudos!

Reviewer: 2

Comments to the Author

I enjoyed reading your manuscript. Depression is a global issue, and your study validates this.

p.1, line 29, does not make sense as written

p. 5, lines 53-55, suggest replacing the 1's with the word 'one'

Comments to the Author

I appreciate the opportunity to review your manuscript. Thank you for making recommended changes to the manuscript. I enjoyed reviewing your work and encourage you to seek an editor advisor to help make the total manuscript read more smoothly.. As previously stated, depression is a global issue, and your study validates this.

Reviewer: 2

Comments to the Author

You have a good start. Major revision is needed in the mechanics of the article. Additionally, please address the lack of citations. Apart from mechanical revisions, the authors need to clarify and strengthen their background research on the relationship between depression, health, and self-reported quality of health.

A great revision is needed in explaining the results and conclusion. The authors are missing a big piece - the usability and future application of their survey tool.

Much of what is written is repetitive as well. Please strengthen your background research, results, and conclusion. Again, I think you are overlooking a great strength of your research - the usability and potential application of your survey tool. (I hope you value how important I think that is1)

Dear Editor in Chief Nursing Forum

Thank you for your email and reviewer comments for this manuscript. Manuscript ID NF-10-19-OA-1257.R2 entitled "Prevalence and Determinants of Depressive Symptoms among Adults in Indonesia: A Cross-sectional Population-Based National Survey". As directed by your correspondence, we are submitting a substantially revised manuscript that addresses all reviewer comments and suggestions. The revision made in manuscript is marked. We thank you for the opportunity to submit this manuscript. We look forward to your feedback

Response for reviewer comments:

Reviewer: 1

Comments to the Author

I enjoyed reviewing the revision of this manuscript. I believe this study is important, however, there are some areas that need revision.

p. 9, line 10, "retrospectives" should be singular

p. 9, line 12, "update" should be updated

p.9, line 45, sentence beginning with "This study" needs to be reworded

p. 9, line 55, need to include "the" before population

p. 10, line 5, the last sentence needs to be reworded or deleted; support from the community is important and interventions should be included; however, not sure you can state social support from the community is expected to prevent depression.

Reviewer: 2

Comments to the Author

Thank you for submitting your work (Prevalence and Determinants of Depressive Symptoms among Adults in Indonesia: A Cross-sectional Population-Based National Survey) and allowing me to review it.

This manuscript addresses a very relevant and important subject for Indonesian population, but, there are some problems with the work that should be considered before publication:

1. Please make sure that your introduction and discussion contains up-to-date literature. Many of the references are outdated, for examples P2 L17 (Zunzunegui, Beland, & Otero, 2001), P3 (Veale, 2003), (Mancuso, Peterson, & Charlson, 2000) and (Mrazek, 2003).
2. There is one statement the author(s) make that requires a reference. “Symptoms of depression have become a public health concern in Indonesia because of the increasing trend of cases, lack of awareness and its high disease burden attributable. There was limited research that assesses the relationship between personal health conditions and depressive symptoms among Indonesian”.
3. Within the introduction: On P3 L41, I suggest to give examples about the “preventive strategies”.
4. P7 L28 & P7 L33 - “tend to be lower for depression” AND “if health decreases” needs re-writing to confer clarity of expressions.
5. Within the discussion, I would think further discussion for the results of the current study here would be useful for the reader to understand the association between self-rated health, physical function, and chronic conditions and symptoms of depression.
6. The second paragraph of “discussion” has an extensive review of studies. You have to discuss your study results regarding these points, how will the reader be able to critically evaluate your results about the relationship between physical function and depression if they are not informed at this point!!
7. P8 L11 - Mention of “sociological factors and culture and traditions that developed in society could make a person more depressed over his physical disabilities. Self-esteem, loss of control and reduced quality of social support will trigger symptoms of depression” Please explain more, and discuss the results of your study regarding these factors.
8. Unfortunately, some ideas or statements were repetitive and disorganized in your discussion. For example, P7 L46, P8 L18 and P8 L28.

9. P8 L28 – “Respondents who have chronic disease conditions also have a higher risk....”. I suggest mentioning the more common chronic diseases that you found in your study that were more associated with depression.

10. The last paragraph of discussion, I think the advantage of this research may include also the stakeholders, healthcare administrators, clinicians, and healthcare providers to develop an intervention program.

Thank you very much, it has been added.

07-Sep-2020

Dear Ms Astutik:

Congratulations! Your manuscript, entitled "Prevalence and Determinants of Depressive Symptoms among Adults in Indonesia: A Cross-sectional Population-Based National Survey" has been accepted in its current form for publication in Nursing Forum. Your manuscript will now be placed in sequence for publication.

Please know that it may be a few months before you hear from us again.

Also, you will be asked by Wiley Publications to complete a signed license agreement (copyright transfer) if you have not done so already. Then as the manuscript moves forward, the copyright editor will be in contact to seek your approval (and to respond to questions if needed) of the edited manuscript. Once the manuscript has been returned to the copyright department, no further changes can be made, so please proof the material submitted to you carefully.

All accepted articles will appear online prior to the print publication. If you'd like to retain copyright and have your article be Open Access, Wiley does offer that option through the OnlineOpen workflow.

Thank you again for your submission. We appreciate your work on behalf of the profession.

Sincerely,

Dr Patricia Yoder-Wise
